

ENGAGE AND SHAPE THE FUTURE EUROPEAN JOB MARKET

Climate-KIC & Certified Professional

Certified Professional is Climate-KIC's innovative programme to certify future-oriented competencies for the European job market. Certified Professional will assess and certify your professional competencies in the areas of transition, innovation and entrepreneurship.

The certificate will:

- Provide evidence of qualifications required in many future-oriented jobs
- Create a community of professionals and experts committed to drive climate innovation
- Offer transparency and flexibility on the European job market by setting a common standard

We are now inviting you to be one of up to 150 participants to join us for the public pilot of the certificate on Accelerating Transitions between August 2016 and March 2017. Spots on the programme will be granted on first come—first served basis.

Your Benefits

Being a pilot candidate will allow you to measure your professional achievements in the function Accelerating Transition against a standard developed by a board of leading scholars and practitioners in the field of transition and system innovation.

By taking part you will:

- Prove your commitment to climate change innovation
- Receive a free appraisal of your professional competencies relevant to future success
- Be invited to join the fast-track certification route, once the Certified Professional is officially launched
- Join a world class network of transition experts
- Shape standards with us for future oriented competencies

In the assessment you need to provide details on transition projects you have worked on and complete a dossier including supporting documents to evidence your competence in the selected fields. The final step of assessment is an online interview by one of our specially trained assessors.

Please have a look at the Timeline for details on the assessment process.

For further information and registration please visit our website:

 www.certifiedprofessional.eu

Registration & Submission of Application and Dossier (until 20 Nov 2016)

Approx. 45 min online interview (no later than 22 Jan 2017)

Climate-KIC is supported by the EIT, a body of the European Union
